## *Center of Attention Pedestal Table* by Thome George

---

Thome George allows neither weather nor mountain lions to deter him when he's searching out natural materials — willow limbs, twisted branches, birch twigs and pine cones — near his home in the north Cascade Mountains for his one-of-a-kind functional art pieces. His *Center of Attention* table does indeed draw the eye with its perfectly proportioned but free-form design. (It wowed the crowd and won the prestigious Exhibitors' Choice Award at the 2011 Cody High Style

show.) We love the way his pieces, which include hanging collages and architectural elements, evoke natural phenomena such as waterfalls. And we're inspired by his passion for teaching adults and youth. By passing on his knowledge and techniques, he's guaranteeing the perpetuation of unique celebrations of nature.
